Posidonia Today

No. 2 Tuesday 7 June 2022

Greece welcomes global shipping

Opening to the sound of rapturous applause, representatives of the world shipping community, atomised for two years thanks to the pandemic, reconvened for the ribbon-cutting on the world's biggest shipping bash.

"Every Posidonia is special," said a triumphant Theodore Vokos, Managing Director of Posidonia Exhibition SA, taking the stage in front of a packed hall of audience members, many of them wearing masks. "It is time to celebrate the reinstatement of Posidonia after a long health and economic crisis. The Greek shipping sector has shown remarkable resilience in reinventing itself against strong headwinds, and is now stronger than ever before."

Speaking in front of an 800-strong audience comprising heads of states, international shipping ministers, EU officials, chairpersons of international organisations, Greek cabinet members and decision makers from the world's biggest maritime companies, the Greek Prime Minister opened his speech praising the Greek shipping industry for its 7% contribution to the country's GDP and the 200,000 jobs it has created for Greek citizens.

The overall atmosphere was one of tentative jubilation as the joy of reunion was clouded by the Russian invasion of Ukraine. Greek Prime Minister Kyriakos Mitsotakis acknowledged the outsize role that Greek energy trades play in the current paradigm shift, saying: "The war in Ukraine forces Europe to look toward energy markets in the Middle East, in Africa and America. These new markets can be conquered by shipowners.

"We ask the Greek shipping industry to understand that there must be stability in the world. This war must end."

Mltsotakis slammed the influence of "authoritarian and autocratic leaders... who use any excuse to violate the borders and the sovereignty of their neighbours".

Recurrent in the opening ceremony speeches was an emphasis of the key role shipping plays in low-carbon transport. Speakers made clear their concerns over EU regulations, with the need to decarbonise ultimately requiring a level playing field.

Mitsotakis stressed the importance of shipping being treated with an equal footing. "In the 19th century the Greek shipowners turned from sail to steam, and now we must do the reverse – returning to a shipping that is neutral from an energy point of view. We have to intensify research, to develop new technologies and fuels, [but] second, it is imperative that we revise EU rules to allow competition across transport modes to happen on an equal basis, so that he who pollutes will be paying. This is a historical challenge that calls for a united front," said the Prime Minister.

"Over the past four years, shipping proved once again that it is all-weather," said Melina Travlos, who in February became the first female President of the Union of Greek Shipowners. "The figures speak for themselves; over 90% of world trade; 70% of EU foreign trade. Custodian of the prosperity and wellbeing of people, of states, and of society. In times of peace, times of war, and times of global crisis, shipping has managed to navigate this volatile environment.

Greek Prime Minister, Kyriakos Mistotakis, flanked by Theodore Vokos, Managing Director of Posidonia Exhibitions (left) and Melina Travlos, president of the Union of Greek Shipowners and Adina Ioana Vălean, EU Commissioner for Transport, Iaunches Posidonia 2022.

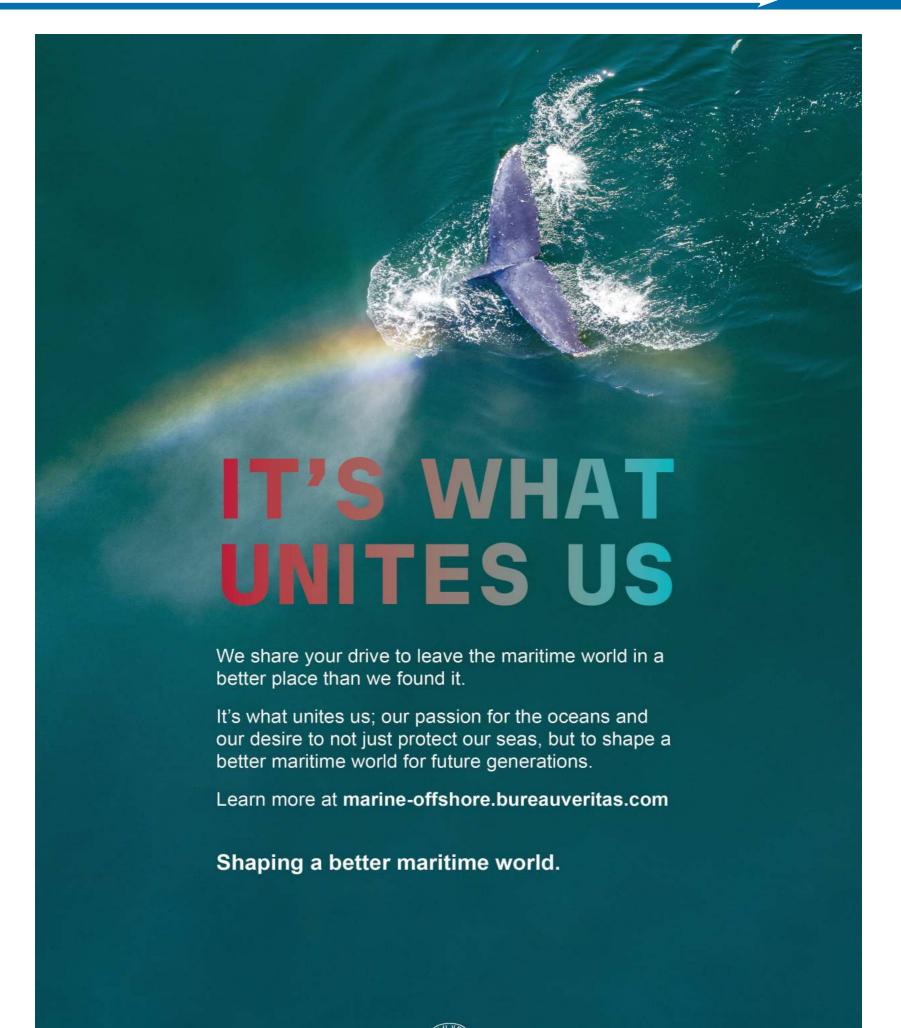

"It is a top priority that Europe not create deadlocks. Shipping is multidimensional; understanding it requires study, specialisation and years of expertise. We must awaken those in charge and enlighten them with what is really sustainable.

"Greek shipping is a national asset, and it is particularly important that the state recognises the superiority of our shipping nationally and internationally. We should quard our status as a maritime nation."

EU Commissioner for Transport, Adina Ioana Vălean called attention to seafarers and their heroism, who kept needed materials moving even as the rest of the world ground to a halt. "Covid-19 changed consumption patterns overnight, complicating crew changes, increasing congestion. Asymmetric recovery around the world has not helped. But delivering food, medicines, and everyday goods, seafarers were the unsung heroes of these times."

But smiling in the face of grim headwinds and upcoming challenges, Prime Minister Mitsotakis delivered his parting words: "As Pericles said: great is the power of the country that controls the sea. Fair winds and following seas to you all!".

Posidonia*Today* Tuesday 7 June 2022

Greeks to play pivotal role in setting up 'Solidarity Lanes'

As the world's largest shipowning and cross-trading nation, Greek owners are set to play a major role in the establishment of Solidarity Lanes. This was a key message yesterday from **European Transport Commissioner,** Adina Ioana Vălean, as she spoke to journalists immediately prior to the official opening of Posidonia 2022.

Designed to help Ukraine resume grain exports, the European Union's Solidarity Lanes initiative aims to bypass blocked Black Sea ports by establishing new land and sea transport links. These are now seen as essential in averting a global food crisis.

Vălean indicated that all transport modes will be considered in new supply chains, including trucks, tracks and trains,

as well as storage and transhipment facilities. Describing shipping as a 'very agile industry', she said that this could have important commercial implications for the maritime sector and could even lead to changes in business models.

The move comes as large parts of the developing world. including nations in Africa, report growing pressure on food supplies. Ukraine is one of the world's largest producers of wheat, corn and flour, as well as sunflower oil, but most of its exports are currently blocked.

Meanwhile, Greek owners will also play an essential role in guiding European shipping into more sustainable and digital operations as the sector proceeds to a zero-carbon future beyond 2050. The bloc's Emissions Transport System would inevitably lead to higher costs, she said, but that would, in turn, encourage the take-up of new, more sustainable fuels that is becoming increasingly urgent.

Noting the hardship experienced by many seafarers during the pandemic, she said that the sector had only just begun to

recover from the pandemic when the Ukraine crisis struck. In addition to more seafarers trapped aboard ships stuck in the Black Sea, the sector's commercial operations have also been severely impacted by sanctions against the aggressor.

Transport had already implemented a range of punitive measures, Vălean noted, notably in the aviation sector with restrictions on fly zones and aircraft leasing. Now it was shipping's turn to ramp up pressure.

She said that she did not want to speculate further on other possible sanctions. However, she noted that measures were now in place to ensure that within the next six months,

insurers would be forbidden from underwriting transport risks relating to Russian oil movements.

Owners warn against sanctions

Sanctions do not work, according to leading Greek shipowners who are concerned about moves to step up trade measures against Russia.

"Sanctions have never worked," shipowner George Procopiou told a panel at Capital Link's Maritime Leaders Summit, a Posidonia event, June 6.

The founder of Dynacom / Dynagas pointed to previous sanctions against Venezuela and Iran. "Iran became stronger and better at being selfsufficient. Venezuelans are suffering and the elite is having a good time," he said.

Apart from being counter-productive, sanctions also cause confusion, he said. Bankers and financiers make matter worse by being stricter than the regulations themselves.

Evangelos Marinakis, principal of Capital Maritime, stressed the economic fallout of sanctions on inflation and commodity prices. "Instead of trying to find a peaceful solution that will solve this big problem... they're discussing more sanctions", said Marinakis.

"Instead of penalising Russia, we're penalising ourselves. Sooner or later we'll see the consequences... we're going to have a huge recession in front of us".

MarineTraffic: Shipping is Here

International maritime analytics platform MarineTraffic is promoting its services under the "Shipping is Here" tagline at Posidonia. The Athens-based company has created a maritime data ecosystem which includes vessel positions, meteorological forecasts, asset values, container tracking, nautical charts and is visited by six million users a month.

MarineTraffic is now testing an onboard device which will allow any vessel to become a listening station, collecting AIS and meteorological data from the surrounding area as well as broadcasting its own proprietary operational and navigational data for in-house use. It is anticipated that this will significantly improve the quality of global maritime vessel tracking data and allow smaller craft using AIS

transponders to be detected away from shore for the first time.

The device is currently being trialled and will be available in early 2023. It will extend and augment the MarineTraffic network of 5,000 landbased AIS stations by the addition of "roaming" stations. "We have built a platform which goes way beyond a vessel tracking service," said Dimitris Lekkas, MarineTraffic Chief Product Officer. "Data thrives when it works seamlessly with other data, turning it into real information and actionable intelligence. The connected vessel will deliver more accurate models for vessel arrival times and therefore help reduce fuel consumption. Our users will be able to build their own dashboards and combine their own data with information drawn from the huge MarineTraffic ecosystem."

CONSULT NAVIGATION AGENCY AS SPONSOR OF SUEZ CANAL AUTHORITY

Confidence, Honesty, Reliability are our aims for success

Our Services

Suez Canal Transit:

We have a special department to calculate Suez. Canal dues and tonnage for all vessels includes the request of the Suez Canal Transit Rebate.

Shipping Agent Services:

- Crew changes and security teams full operation: meet & greet hotel bookings, shore passes, travel arrangements
- Protective agent for Suez Canal and all Egyptian ports complied with the anti corruption policy
- Custom clearance and delivery spare parts, documents as well land and dispatch spares/documents/oil samples Delivery of CTM (Cash to Master)
- Garbage and sludge disposal

Port call vessels:

Handling cargo operation at all Egyptian Ports and terminate, we are specific agent at all Egyptian Ports and Suez Canal area.

Anti corruption policy to be strictly Complied during transit or calling ports. ration at all Egyptian Ports and terminals, we are specialists in deck cargo and heavy lift.

Stores and provision supply:

rs all Egyptian Ports and terr

THE ESSENTIALS OF DIGITAL CHARTERING

www.seabo.com

Posidonia*Today* Tuesday 7 June 2022

MTR sees best ever year with over 10,000 users

Having trained some 10,000 seafarers over the last 12 months. Turkey's MTR has reached 30,000 in the last decade, using its digital training platform.

The Istanbul-headquartered company, exhibiting at Posidonia at its stand 1.415 through its Greek agent Oriani, employs 25 people throughout the UK, Singapore and the United States, and has seen its best ever year of training, according to CEO Ahmet Özgür Alemdağ (pictured), with some 500 ships subscribing to its training services.

Training regimes include VR games, video courses, CBT, mental health awareness training and other features.

"There are very few other systems like ours which provide such a comprehensive digital training package," said Alemdağ. "Moreover we see huge challenges on the horizon around decarbonisation, ESG, mental health, combined with a

ramping up of industry standards like the TMSA DryBMS and Sire 2.0 (Ship Inspection Reporting Programme). All this is making far greater demands on training and assessment providers and the need for sophisticated digital talent and competence management solutions."

Alfa Laval – Posidonia priorities

Four years have passed since the last Posidonia - four years of unprecedented change for the global shipping industry. Technology companies have faced a wide range of new challenges as decarbonisation, digitalisation and tighter regulatory compliance climb the agenda.

For companies such as Alfa Laval, it's a question of what best to prioritise. However, the company has a broad range of new developments to display, with effective answers from bow to stern, all of them supporting shipping's fuel transition and with a 24/7 global service network.

Apart from the recent digital boost from its acquisition of StormGeo (see separate story), Alfa Laval will have several focus areas. Energy efficiency is a top priority as shipping wrestles with soaring fuel costs and the regulatory drive to raise ship

productivity. The company will be highlighting the energy-saving potential from wind propulsion, a result of its joint venture, Oceanbird, with Wallenius

Alternative fuels are also high on the agenda. Alfa Laval's dual-fuel boilers and exhaust gas cooling system, PureCool, are set to boost the take-up of LNG while the company is working on other technologies relating to LPG, biofuels, methanol and, imminently, ammonia.

Emissions to air and water are also a priority. As time runs on towards the 2024 ballast water deadline, the company will be demonstrating the accelerating take-up of PureBallast as well as PureSOx and Pure NOx.

ABS research looks at carbon market potential

The potential for carbon markets and pricing to re-shape global shipping, as well as the impact of the emerging hydrogen and carbon value chains, are explored in depth in the latest support for the industry's decarbonisation ambitions from ARS

The groundbreaking analysis is at the heart of the fourth edition of the ABS Setting the Course to Low Carbon Shipping series, as well as insights on the industry's progress to low- and zero-carbon operations.

"We are in the early innings of a decade of change for our industry and this latest outlook shows just how extensive and rapid that change is going to have to be if we are to meet 2050 objectives," said Christopher J. Wiernicki, ABS Chairman, President and CEO. "We will need both hydrogen and carbon value chains to mature and scale up rapidly and, as this report also makes clear, shipping, in all its forms, is going to be a critical enabler of that transition. Now, we need governments to step in with policies to accelerate development of low-carbon solutions and secure the proper infrastructure for their distribution," said Wiernicki.

The analysis is the fourth in a series of outlook documents published by ABS to showcase decarbonisation research and thinking.

The 2022 Outlook also introduces the Net Zero Navigator, a design for a liquid hydrogen carrier, approximately 80,000cu mtr in capacity. The design utilises NASA hydrogen storage technologies to reach such scale as well as hydrogen fuel cells and batteries, which were used for power generation on the space shuttle. It features a pioneering project between ABS and Herbert Engineering Corp. to develop conceptual

ship designs related to transport of liquid CO₂ as well as explore the challenges of carbon capture and storage on board conventional fossil-fueled cargo ships.

"The 2022 Outlook provides a perspective on how new regulations, paired with carbon pricing and the development of new global hydrogen and carbon industries is going to radically change the shape of our industry in the decades to come. Carbon economics is emerging as a major new force in our industry and ABS is committed to helping owners and operators get ahead of these changes and plan their fleets to thrive in the new paradigm," said Georgios Plevrakis, ABS VP, Global Sustainability.

Owners calculate best pathway to CII compliance with StormGeo

StormGeo, recently acquired by Alfa Laval, is exhibiting its CII Simulator, a tool to assess the readiness of vessels for one of the most far-reaching pieces of IMO decarbonisation legislation.

StormGeo promises that the CII Simulator will be capable of assessing the environmental performance of ships as well as calculating the implications of operational efficiency measures on compliance, countering shipowners' "uncertainty" over the introduction of the scheme. "StormGeo's unique CII Simulator helps shipowners and operators proactively mitigate the

risk of being commercially uncompetitive while navigating the path towards a sustainable future for shipping," said Kim Sørensen, COO of Shipping at StormGeo.

Norwegian pool operator Hansa

Kim Sørensen: CII Simulator helps shipping navigate a sustainable future. Hansa Tankers COO.

Tankers, which has already adopted the tool, affirmed that CII Simulator "makes it easy to measure the CO2 impact of both prefixture and post-fixture emissions results, and allows us to readily calculate the final CII based on validated data per voyage and year, including projections for future compliance," according to Torfin Eide.

Posidonia Games attract over 2,700 shipping people

Shipping's mini Olympics, the Posidonia Games, lived up to its reputation as a popular extravaganza with some 2,700 shipping professionals from around the ${\bf globe\ show} {\bf casing\ their\ sporting\ skills\ from\ sailing,\ golfing,\ football,\ basketball}$ and recreational running at the five events which made up the games.

After an extended break, the prestigious Posidonia Cup sailing regatta returned and brought the international shipping community back together for the 10th time

on June 3 for an exciting race during the day and a warm and fun awards reception at night! The Posidonia Cup yacht race attracted some 45 vachts and over 600 crew members, who also participated at the prestigious Award Ceremony, where the

winners were presented with their trophies in a picturesque setting, at Ble Pavilion. The 'Performance' Category went to the Angelicoussis Group's X-40 Sport-type boat Sugar. The 'Standard' category went Steamship Mutual's Swan 55 boat Daphne's Smile. In the 'Classic' category, the Baltic Exchange's Larne came in first.

The streets of Piraeus welcomed keen runners from all over the world, who ioined forces for a good cause June 5. Proceeds of the 3rd edition of the 5km Posidonia running race were again donated to the Municipality of Piraeus, the **Public Benefit Municipal**

Posidonia 2022 Shuttle Bus Programme

ROUTE 1: Athens International Airport Metro Station - Metropolitan Expo

· Tuesday 31 May - Sunday 5 June (build-up period)

Roundtrips throughout the day from 7:45 to 20:15

Tuesday 7 to Thursday 9 lune

Roundtrips throughout the day from 10:00 to 19:30

Friday 10 lune

Roundtrips throughout the day from 10:00 to 18:00

Note: Shuttle Bus runs every 30 minutes Note 2: Route 1 services Sofitel at Airport

ROUTE 2: Syntagma Square (Syntagma sq. & Fillelinon str. corner) - Metropolitan Expo

Tuesday 7 to Thursday 9 June

Departures from Syntagma Square: 9:00, 9:30 and 10:00 Return from Metropolitan Expo: 18:30, 19:00 and 19:15

• Friday 10 June

Departures from Syntagma Square: 9:00, 9:30 and 10:00 Return from Metropolitan Expo: 16:30, 17:00 and 17:15

ROUTE 3: Doukissis Plakentias Metro Station - Metropolitan Expo

· Tuesday 7 to Thursday 9 June

Roundtrips throughout the day from 10:00 to 19:30

· Friday 10 June

Roundtrips throughout the day from 10:00 to 18:00

Note: Shuttle bus runs every 30 minutes

ROUTE 4: Glyfada Old Town Hall (on Possidonos Avenue/ opposite the St. Constantine & Helen Orthodox Cathedral) - Metropolitan Expo

Tuesday 7 to Thursday 9 lune

Departures from Glyfada Old Town Hall (on Possidonos Avenue/ opposite the St. Constantine & Helen Orthodox Cathedral): 9:00 and 10:00

Return from Metropolitan Expo: 18:30 and 19:10

Friday 10 June

Departures from Glyfada Old City Hall (on Possidonos Avenue): 9:00 and 10:00 Return from Metropolitan Expo: 16:30 and 17:15

Corporation of Piraeus and other organisations.

About 100 golfers grouped in 25 teams competed in the Posidonia golf event under the glaring Athens sun on June 5. It even produced a hole-in-one from Tord Nilsson of the Swedish Club, but overall victory went to Athens-based brokerage, Handy Chart, which was closely followed by Marine

Tools and classification society, DNV.

The 7th edition of the exciting Posidonia Shipsoccer Tournament kicked off only

24 hours before the exhibition's official opening, with 28 teams of shipping executives, divided into four groups, competed for the popular Posidonia Shipsoccer trophies in a 5x5 format. The three winners were Ariston Navigation Corp. - 1st, DHL Express - 2nd, and Marita Hellas SA 3rd.

By popular demand, the first edition of the muchanticipated Posidonia 3-on-3 Basketball Tournament took place on June 4 at the indoor courts of Eurohoops Dome, in Kifissia, Athens. Attracting some 150 shipping executives, the event had lots of excitement, fun and

networking opportunities. Some 28 teams competed.
